SUMMARY

- Node.js backend developer focused on building secure REST APIs and database-driven services using Express.js, JWT, Sequelize, PostgreSQL, and MongoDB.
- Hands-on experience with middleware-driven architecture, validations, and consistent error handling for production-ready APIs.
- Strong debugging mindset and collaborative team approach to deliver reliable backend features.

SKILLS

JavaScript • TypeScript • Node.js • Express.js • REST APIs • JWT • Sequelize ORM • PostgreSQL • MongoDB • React.js • Tailwind CSS • Linux • Docker • Git • GitHub • GitHub Actions • Postman

EXPERIENCE

Opticodes Technologies Pvt Ltd, Kanpur Nagar — Web Application Developer (Apr 2025–Present)

- Built and maintained Node.js/Express.js backend services and REST APIs using modular routing and middleware-based architecture.
- Implemented JWT authentication and authorization to secure protected endpoints and enforce role-based access patterns.
- Designed and integrated PostgreSQL data models using Sequelize ORM, including validations and environment-based configuration.
- Improved stability by debugging and resolving server-side issues, strengthening validation, error handling, and response consistency.
- Currently working on the ERP365 (erp365.in) product, contributing to backend modules and invoicing-related workflows.

PROJECTS

ERP365 (erp365.in) — Opticodes Technologies

- Currently contributing to a web-based ERP platform supporting e-invoicing and sales invoicing workflows through backend APIs and application modules.

Real-Time Chat Application (WebSocket / Socket.IO)

- Built a real-time chat application using Node.js, Express.js, and WebSocket (Socket.IO) for low-latency, bi-directional messaging.
- Secured APIs and socket connections using JWT-based authentication and authorization.
- Delivered core chat features including online/offline presence, typing indicators, and message history persistence.
- Modeled and stored users, conversations, and messages in MongoDB/PostgreSQL; validated APIs and real-time events using Postman.

Food Delivery System (Full-Stack App)

- Contributed to a full-stack food delivery application by building responsive UI and backend features using React, Node.js, Express, and MongoDB.

EDUCATION

MCA — Maharana Pratap Engineering College | CGPA: 8.11

CERTIFICATIONS

IBM — Web Development Fundamentals • NIIT Foundation — Digital Productivity
